Hi

I'm looking for a website **for an NFT project** …
It should be a one-page site. My Budget is $50.

Text content **from here**…
do *NOT* include text highlighted in yellow, (these are notes for you).

Also make sure to <u>use the same text styles</u> (e.g. italic, bold, underline etc…) as you see in the above document.

Use the **media in this folder**… to create a good-looking website.
feel free to edit to make it suitable for your design, or ask me if you are unsure.

<u>The website you'll develop should be:</u>

– Should <u>NOT</u> be based on CMS (i.e. no WordPress or similar).

– One-page website… divided into sections (navigation button leads to each section… by animated scroll).

– Must have parallax effects .. ALOT of parallax effects, for both text and images.

– Slider (slide show for image examples)

– Sticky navigation bar (on top) when user starts scrolling,.. It sticks on top (always visible)

– Sections separated by lines, NOT horizontal:

What are Fishbowl Heads?

5,555 generative NFTs · 12 bases · One Million
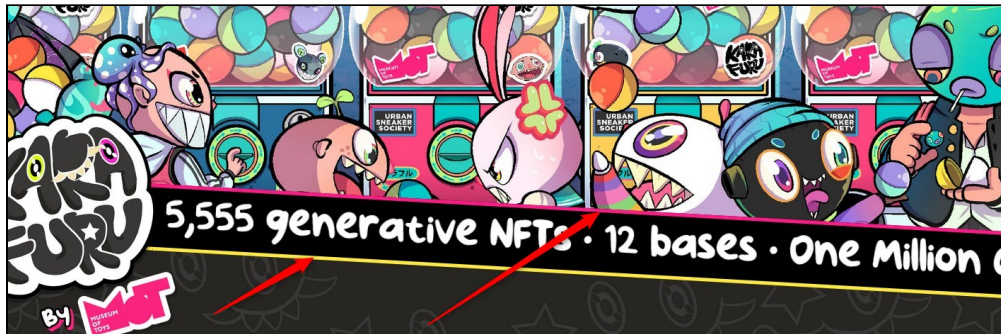

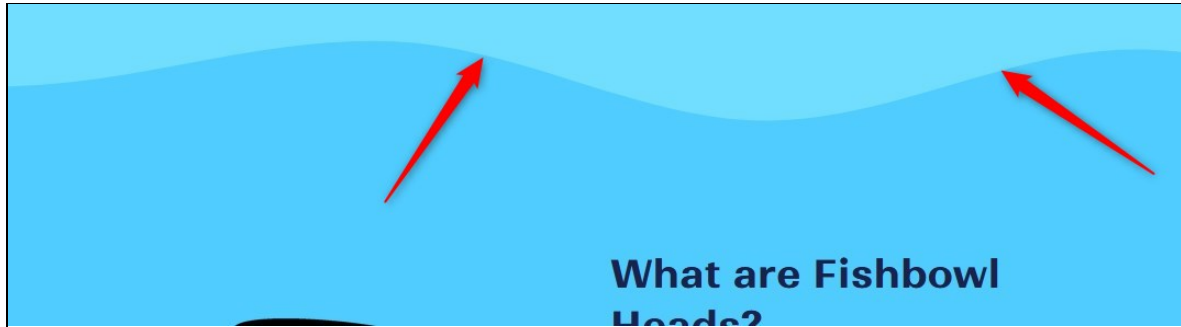

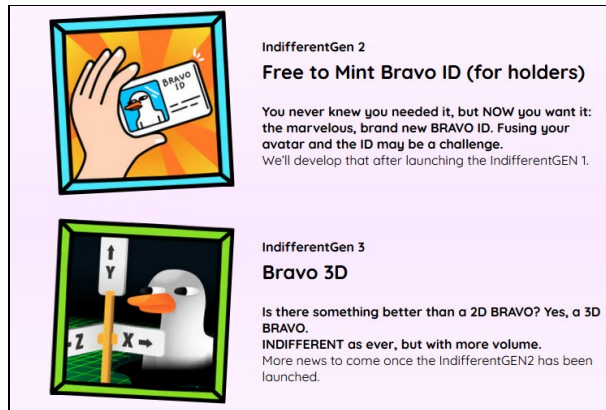

– irregular shapes inside the page design

I WANT YOUR

Some elements, should NOT horizontal or vertical… it should be tilted …
here are some examples:

Do you want to join the The INDIFFERENT Community?

VIEW ON OPENSEA

IndifferentGen 2
Free to Mint Bravo ID (for holders)

You never knew you needed it, but NOW you want it: the marvelous, brand new BRAVO ID. Fusing your avatar and the ID may be a challenge.
We'll develop that after launching the IndifferentGEN 1.

IndifferentGen 3
Bravo 3D

Is there something better than a 2D BRAVO? Yes, a 3D BRAVO.
INDIFFERENT as ever, but with more volume.
More news to come once the IndifferentGEN2 has been launched.

– Upside down logo, in the middle of the upper side of the browser's screen

BRAVO
THE INDIFFERENT DUCK

The Indifferent Duck is a 10,000 NFTs collection customized by the collectors and minted on the Ethereum Blockchain.
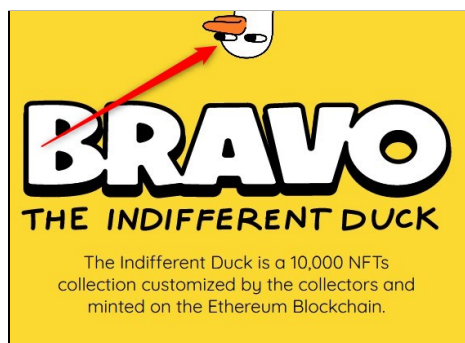

– Should use a suitable font **from google fonts only** … please don't use any font if its not there in google fonts.

– Use big/bold fonts … because this is an informal website.

Example:

BRAVO MAKER

– Must be responsive to mobile devices.

– Must loading should achieve, at least 90 in PageSpeed Insights (for both mobile and desktop version)

– Use **this website** to check if text and images are responsive

Good example of website designs that I love:
https://www.theindifferentduck.com/
https://fishbowlheads.com/
https://furballs.com/

https://www.grandtheftbacon.com/
https://www.cutepoop.art/
https://www.bobocomics.xyz/
https://thebeeings.io/
https://www.bueno.art/bueno-generator
https://www.wabisabicollective.io/ their parallax WOW!
https://www.dippies.io/

WARNING: please do not copy code from any of these websites…
If the code is available for free, e.g. on GITHUB or Codepen or similar…
then this is fine.
